# Index of Subjects

Adenovirus, epidemiology of enteric, infection in prospectively monitored Argentine families, 539
AIDS, short-term predictions of HIV prevalence and, incidence, 149

Bone marrow transplants, selective decontamination in, 349

Cheese, an outbreak of *Salmonella dublin* in England and Wales associated with a soft unpasteurized cows' milk, 389
Cockroaches as carriers of bacteria in multi-family dwellings, 483
Coliforms, transferable antibiotic resistance among thermotolerant, from rural drinking water in India, 113
Custard slices, an investigation into an outbreak of *Salmonella enteritidis* phage-type 4 infection and the consumption of, and trifles, 397

Diabetes mellitus, factors influencing oral carriage of yeasts among individuals with, 507

Enterococcal, characterization of, isolates by restriction enzyme analysis of genomic DNA, 69
*Escherichia coli*, transferable high-level trimethoprim resistance among isolates of, from urinary tract infections in Ontario, Canada, 463
*Escherichia coli*, virulence factors of enteric, in young Aboriginal children in north-west Australia, 283

Faecal bacteria, circulating antibodies against, assessed by immunomorphometry: combining quantitative immunofluorescence and image analysis, 497
Foot-and-mouth-disease virus, genetic relationships between southern African SAT-2 isolates of, 547

Gastrointestinal decontamination, history of recognition and measurement of colonization resistance of the digestive tract as an introduction to selective, 315
Giardia – diagnosis, clinical course and epidemiology. A review, 1

HIV, short-term predictions of, prevalence and AIDS incidence, 149
*Helicobacter pylori*, musings from the epidemiologic armchair, 81
*Helicobacter pylori*, ribosomal RNA gene restriction patterns of: analysis and appraisal of *Hae* III digests as a molecular typing system, 35
Hepatitis A, salivary antibody testing in a school outbreak of, 161
Hepatitis A, an outbreak of, in Gloucester, UK, 167
Houseflies, vector potential of hospital, with special reference to *Klebsiella* species, 143

Influenza, comparison of the HA genes of type B, viruses in herald waves and later epidemic seasons, 559
Intensive care, selective decontamination of the digestive tract in, 337

*Klebsiella pneumoniae*, the ability of airborne, to colonize mouse lungs, 121
*Klebsiella*, vector potential of hospital houseflies with special reference to, species, 143

*Legionella pneumophila* in residential water supplies: environmental surveillance with clinical assessment for Legionnaires' disease, 49
*Legionella pneumophila*, serological cross-reaction between, and campylobacter in the indirect fluorescent antibody test, 291

Meat, destruction of bacteria on fresh, by hot water, 491
*Mycobacterium bovis* in England and Wales: past, present and future, 23

*Mycoplasma pneumoniae*, laboratory diagnosis of, infection. 4. Antigen capture and PCR-gene amplification for detection of the mycoplasma: problems of clinical correlation, 519
*Neisseria gonorrhoeae*, concordance of autotype/serovar classes of, between sexual contacts, 265
*Neisseria lactamica*, secretor status and humoral immune responses to, and *Neisseria meningitidis*, 445
*Neisseria meningitidis*, phylogenetic and epidemiological analysis of, using DNA probes, 227
*Neisseria meningitidis*, transmission of, among asymptomatic military recruits and antibody analysis, 241
*Neisseria meningitidis*, secretor status and humoral immune responses to *Neisseria lactamica* and, 445
Neutropenic patients, selective decontamination in, 327

Poultry, ELISAs and the serological analysis of salmonella infections: a review, 361
Poultry, the identification of *Salmonella enteritidis*-infected, flocks associated with an outbreak of human salmonellosis, 405

Quinolone, occurrence of, resistance in *Staphylococcus aureus* from nosocomial infection, 413

Rotavirus, identification of human and bovine, serotypes by polymerase chain reaction, 303

*Salmonella dublin*, an outbreak of, infection in England and Wales associated with a soft unpasteurized cows' milk cheese, 389
Salmonella, ELISAs and the serological analysis of, infections in poultry: a review, 361
*Salmonella enteritidis*, an investigation into an outbreak of, phage-type 4 infection and the consumption of custard slices and trifles, 397
*Salmonella enteritidis*, serological responses of chickens experimentally infected with, PT4 by different routes, 297
*Salmonella enteritidis*, the identification of, -infected poultry flocks associated with an outbreak of human salmonellosis, 405
Salmonella, the relationships between infecting dose and severity of disease in reported outbreaks of, infections, 371
Selective decontamination in bone marrow transplant recipients, 349
Selective decontamination in neutropenic patients, 327
Selective decontamination of the digestive tract in intensive care, 337
*Serpulina* (*Trelonema*) *hyodysenteriae*, the serological grouping for, 255
*Shigella*, high level resistance to trimethoprim, cotrimoxazole and other antimicrobial agents among clinical isolates of, species in Ontario, Canada – an update, 473
Shigella, molecular epidemiology of, infections in Israel, 273
Spirochaetes, intestinal, colonizing Aborigines from communities in the remote north of Western Australia, 133
Staphylococci, the epidemiology of ciprofloxacin resistance in coagulase-negative, in CAPD patients, 97
*Staphylococcus aureus*, a study into the mechanism of the Crystal Violet reaction in, 87
*Staphylococcus aureus*, occurrence of quinolone resistance in, from nosocomial infection, 413
*Staphylococcus epidermidis*, a study of phenotypic variation of, using Congo red agar, 423
*Staphylococcus hyicus*, a longitudinal study of, colonization of vagina of gilts and transmission to piglets, 433
*Staphylococcus*, restriction endonuclease fingerprinting of genomic DNA of, species of bovine origin, 59
Streptococcal, a one-year study of, infections and their complications among Ethiopian children, 211
Streptococcal infection in general practice, 177
Streptococcal pharyngitis in general practice. 1. Some unusual features of the epidemiology, 181
Streptococcal pharyngitis in general practice. 2. A note of dual infection and transient urinary abnormalities, 191
Streptococci, splenomegaly in acute infections due to group A, and viruses, 199

Trimethoprim, high level resistance to, cotrimoxazole and other antimicrobial agents among clinical isolates of *Shigella* species in Ontario, Canada – an update, 473

Trimethoprim, the distribution of the DHFR genes in, -resistant urinary tract isolates from Taiwan, 453
Trimethoprim, transferable high-level, resistance among isolates of *Escherichia coli* from urinary tract infections in Ontario, Canada, 463
Trifles, an investigation into an outbreak of *Salmonella enteritidis* phage-type 4 infection and the consumption of custard slices and, 397

Yeasts, factors influencing oral carriage of, among individuals with diabetes mellitus, 507
